Professional Experience

Inex **Jul/2024 – Current**

Capitalization Leadership Support Team

Web Systems Developer (Full-Stack)

Key Responsibilities:

- Work on the support team, focusing on resolving bugs and issues, as well as developing new features for the company's products, including Telesena, Bem da Sorte, and Renda Fácil.
- Development using technologies such as NodeJS, Nest, React, Next, Angular, Typescript, Bootstrap, AWS (S3, SQS, Lambda), Elastic APM, New Relic, and Argo CD to ensure high-performance and scalability of systems.
- Responsible for deploys and code reviews, ensuring code quality and the continuous delivery of stable and efficient solutions.
- Collaboration with cross-functional teams to ensure the implementation of solutions that meet business needs and improve the user experience.

Key Achievements:

- Bug fixes and continuous improvements to various systems, ensuring the stability and efficiency of operations.
- Creation and implementation of a payment reconciliation system, accompanied by detailed reports, which optimized internal processes and improved the accuracy of financial data.

- Participation in the modernization of IT infrastructure, integrating AWS services for greater scalability and system resilience.
- Significant contribution to improving code quality and development processes, increasing team productivity and customer satisfaction.

Agroboard

Aug/2023 – May/2024

Commodity market risk management

Web Systems Developer (Full-stack)

Key Responsibilities:

- Developing and maintaining full-stack web systems for the Agroboard platform, focused on digitizing and simplifying commodity risk management and derivatives accounting.
- Responsible for implementing innovative features and refining existing processes to enhance efficiency and user experience on the platform.
- Actively collaborating with the Customer Success team to deeply understand system requirements and provide tailored solutions aligned with business needs.
- Proficient in the use of a variety of technologies, including React JS, Tailwind, Codeigniter 3, PHP, Composer, HTML 5, CSS, Javascript, JQuery, Bootstrap 4/5, Git, JSON, Docker, Microfrontend and APIs integrations.

Key Achievements:

- Consistent delivery of high-quality projects, with a focus on complete customer satisfaction and exceeding their expectations.
- Recognized for the ability to efficiently solve complex challenges and present innovative solutions that drove the platform's progress.
- Effective implementation of systems leading to process optimization and substantial improvement in customer productivity.
- Precise project management, ensuring strict adherence to deadlines and successful project deliveries.

Web Systems Developer (full-stack) - Freelancer

Nov/2022 – Aug/2023

Key Responsibilities:

- Creating institutional websites, systems, administrative panels, landing pages, platforms, forms, dashboards, widgets, and blogs.
- Full-stack web systems development.
